## Product Sheet for:

### New from Broco Tactical: ENFORCER™ Door Rams

Broco **ENFORCER™** series one-man door rams are engineered for rapid forced entry by tactical teams and first responders. The **ENFORCER™** is the first breaching ram with LED lights for target illumination and accurate impact placement.

**ENFORCER™** rams feature unique design ergonomics to maximize striking impact while maintaining a neutral wrist position throughout the arc of the Breacher's swing. Enforcer rams can be thrown overhand, underhand or from the side using a natural motion that derives energy from the hips and shoulders as well as the arms. Users find it's like swinging a baseball bat or throwing a punch.

#### **All ENFORCER™ series rams feature:**

- **Weight forward design** is thrown in front of the Breacher to maximize impact from hips and shoulders. Hits like larger traditional rams.
- **Reach-through handle** for easy one arm carry. Keeps the Breacher's weapon hand free.
- **Red LED lights** show the target without another officer's assistance. Quick release mounting. Easy replacement.
- Chrome carbide **hardfaced impact edge** prevents wear.
- **Fixed rear handle** prevents rear wrist from rolling upon impact.
- **Rotating front handle** maintains proper front wrist alignment throughout arc of the swing.
- Knurled rubber **non-slip grips**.
- Balanced **sling point**. Sling has quick release snap shackle.
- Comfortable **shoulder carry**.
- Welded 1" **steel knuckle guard** protects hand from door jambs.
