**Product Sheet for:**

**F-27**

The F-27 helmet offers high-quality protection for both military combat and Special Forces. Its unique chin strap protects soldiers from sudden attack and is engineered to release in threat situations but may be retained in normal tactical activity.

Features:

- Available in Levels II and IIIA
- Offers 35% more coverage than standard MICH
- MICH style, but only 2.8 lbs
- V-50 1984 FPS
- Patented ASORB system reduces residual force of ballistic impact
- Meets USMIL standard 662
- NATO Stanag 2920
- Special cut in the back for prone firing
- Made of woven poly-aramid
- Three-point chin strap with survival buckle

**F-34**

The F-34 is a military operational helmet that offers a flattened shape on both the sides and the front of the helmet to provide superior protection against blunt-force trauma.

Features:

- Available in Levels II and IIIA
- MICH style, but only 3.4 lbs
- V-50 2027 FPS
- Patented ASORB system reduces residual force of ballistic impact
- Meets USMIL standard 662, NATO stanag 2920, German TL 8470.004
- Complies with EU standard for industrial helmets
- Made of woven poly-aramid
- Three-point chin strap with quick release survival buckle
